ABDULKARIM ABDULMUIN ALMALKI

has successfully completed the online Specialization

Learn SQL Basics for Data Science

This Specialization is intended for a learner with no previous coding experience seeking to develop SQL query fluency. Through four progressively more difficult SQL projects with data science applications, you will cover topics such as SQL basics, data wrangling, SQL analysis, AB testing, distributed computing using Apache Spark, and more. These topics will prepare you to apply SQL creatively to analyze and explore data; demonstrate efficiency in writing queries; create data analysis datasets; conduct feature engineering, use SQL with other data analysis and machine learning toolsets; and use SQL with unstructured data sets.

Sadie St. Lawrence, AI
Strategy Consultant;
Katrina Glaeser, Data
Scientist at Marco Polo;
Brooke Wenig, Machine
Learning Practice Lead
at Databricks; Conor
Murphy, Data Scientist
and Consultant at
Databricks; Don Noxon,
Information Technology
Research Data Scientist
at Intel Corporation

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
